

A heartbeat
away

FHN Cardiac Care

We offer rehab services and interventional procedures including pacemaker, defibrillator, angioplasty, and stent placement. We provide comprehensive care, screening for and controlling risk factors, diagnosis and treatment and aggressive follow up care.

We understand that when seeking cardiac care, you need outstanding technical expertise and access to state-of-the-art technology, but you also want the kind of personal care and attention that only comes when providers have true passion for their work. We believe it's important to give you both.

Our award winning in-house cardiology team puts their whole heart into helping you achieve optimal heart function. FHN was awarded a 2006 Leadership Award for Clinical Excellence in Heart Failure Treatment by VHA Inc., a healthcare provider alliance of more than 2,400 not-for-profit healthcare organizations. The award is based on measures that are nationally accepted as indicators of quality.

Find excellence in cardiac
care close to home.

We're here. For you.

When you need quality cardiac care, you need not travel far. FHN provides you with complete heart care and support close to home.

Comprehensive Diagnostic Services

In addition to cardiac catheterization lab services, we also offer a variety of comprehensive diagnostic services. The vascular lab at FHN uses non-invasive diagnostic technology to visualize veins and arteries to determine the best course of treatment for any blockages or other issues that are discovered.

Services include:

- Exercise and pharmacological stress test
- EKG
- Echocardiogram
- 30-day cardiac event monitor
- Carotid studies

State-of-the-art Technology

The FHN Judy and Virgil Bocker Cardiovascular Center at FHN Memorial Hospital is a multipurpose, all-digital lab enabling FHN to offer you complete cardiovascular care and support in one centralized location close to home. Our state-of-the-art center offers:

- A recovery room designed to serve up to six patients simultaneously, including high-risk patients who previously would have been sent out of the area for treatment
- Increased space and flexibility to accommodate future demands, which we expect to increase 10–20 percent each year for the foreseeable future
- The most current technology available, 24 hours a day

Cardiopulmonary Rehab

After a cardiac intervention, rehabilitation at FHN is part of your comprehensive treatment. We'll work with you in a friendly atmosphere to get your heart and respiratory system as healthy as possible.

FHN gets to the heart of the matter when it comes to providing patients with excellent cardiac care ... and it's just a heartbeat away!z

Cardiovascular Center

Our team of physicians, nurses and technologists provide state-of-the-art medical care to our patients. An imaging system called Innova™ 3100 by GE is used in both cardiac and peripheral studies, pacemaker and stent placements, as well as interventional radiology. The procedures are performed while physicians view the vessels and anatomy of the cardiovascular system, from the heart all the way to the finest arteries and veins in the fingertips and toes.

The cardiac catheterization laboratory provides services essential to the management and treatment of patients with coronary artery disease. Services provided at our center include:

- Right and left heart catheterization
 - Diagnostic coronary, renal and peripheral angiograms
- Cardioversion
- TEE (transesophageal echocardiogram)
- Abdominal arteriogram
- Interventional procedures including:
 - Coronary angioplasty
 - Coronary stent
 - Pacemaker and defibrillator placement
 - Peripheral and renal stents
