FHN IS OFFERING TWO $119 HEART TESTS DURING AMERICAN HEART MONTH!

How’s your heart health? How strong is your heart?

Your heart is an amazing machine – it beats about 100,000 times a day, circulating all the blood in your body about once each minute. Your heart is literally your key to good health: Heart disease is the leading cause of death in the U.S. Learning about and addressing your risks for heart disease are the best way to stay healthy, and FHN’s heart team is here to help.

For American Heart Month in February, we’re offering special pricing on two tests that can give you a good look at your heart health if you have no known coronary artery disease and no prior heart issues.

$119 FHN’S CALCIUM SCORING CT HEART SCAN uses CT scanner technology to detect calcified plaque in arteries, an indication of potential heart issues. This non-invasive x-ray takes only a few minutes and does not require any physical activity.

$119 STANDARD WALKING TREADMILL STRESS TEST helps determine artery condition and may be right for you if you have risk factors for heart disease such as high cholesterol, existing or borderline high blood pressure, a history of smoking, diabetes, or family history of heart disease. You must be able to walk for this test and not have a history of heart problems.

Call by Friday, February 25 to schedule tests at the special $119 price. The tests must be performed by Friday, May 27, 2022.

For more information or to schedule an appointment, call 815-599-6860. During American Heart Month – and every day – your heart is in good hands at FHN.

These tests should not replace consultations with your healthcare provider. If you do not have a primary care provider, we will work with you to determine how to handle your test results when we communicate them to you. Payment (cash, checks, credit card) due at time of service.

FHN is COVID Safe: Our processes ensure that our hospital and offices are safe for you and your family. Learn more about our COVID-19 safety measures at www.fhn.org
